

Minimize business impact and meet the regulatory obligations of a data breach.

Data Mining, Review, Notification, and Servicing of Impacted Contacts

Gain control of the prevention, data reduction and mining, review, and notification process by partnering with a trusted global enterprise breach response provider. Protect your business and brand reputation with an effective review and notification team.

- Start and scale your breach response within 24 hours of inquiry.
- By leveraging an incident response solution powered by AI-driven data reduction tools and technology, you save time and costs.
- Reduce policyholder risk and improve cyber program margins.
- Ensure timely communication as your dedicated Epiq Incident Response Coordinator guides you through the process.
- Benefit from integration with preferred forensic investigation partners.
- Support your customers and other affected contacts with the latest fraud prevention and credit monitoring solutions, including specialized monitoring for medical records, financial data, and children.
- Prevent and prepare for a breach with cyber risk readiness consulting, tabletop simulation training, and guidance on information governance.
