Use AI to work faster, more accurately, and responsibly.
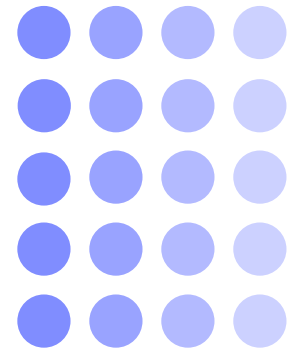

Put AI to work in your organization with a readiness assessment and services to:

- Reduce AI implementation timelines through rapid identification and resolution of key compliance and security issues.

- Ensure AI-generated content only contains information an employee should have access to by leveraging precise data access controls, data classification tools, access management solutions, and integrity checks.

- Optimize AI performance, minimize hallucinations, and reduce risk with data lifecycle management that eliminates stale content.

- Achieve user adoption and productivity goals with prompt usage training.

- Safeguard sensitive information with AI prompt usage and response controls, data classification, and data loss protection.

- Comply with legal and regulatory requirements using AI-related information governance strategies.

Leverage Microsoft Resources

Gain access to Microsoft workshops, technical resources, and additional funding opportunities via Microsoft's Copilot Jumpstart Program.

Potentially pay for your readiness assessment using Microsoft End Customer Investment Funds (ECIF), working with a certified partner who can facilitate the application process.

Why Epiq Legal Solutions?

Experience the advantage of solutions from a partner specializing in legal and compliance.

Drive decisions with AI-enabled solutions that combine people, process, technology, and data.

Epiq Differentiators

— Solve organizational objections related to AI adoption by working with a partner with legal, compliance, and technical expertise and a proven track record for delivering results.

— Assure results by working with dedicated teams with years of AI experience and a strong command of industry best practices.

— Keep engagements on schedule and on budget with dedicated project management resources.

Ten Steps to Successful AI Implementation Across Your Organization

01
Assessment and Strategy
Identify and resolve data quality and security issues.

02
Linked File Remediation
Eliminate unintentional access to sensitive information.

03
Data Classification
Implement AI-enabled information protection labels, including customized use cases.

04
Defensible Deletion
Defensibly delete redundant, obsolete, and trivial data.

05
Data Loss Prevention
Safeguard data with proactive data loss prevention (DLP) controls.

06
Records Retention Management
Meet requirements using a data lifecycle strategy that includes AI and AI prompts.

07
AI Prompt Usage
Control what a user can ask AI and what can be returned.

08
AI Application Usage
Manage the use of data across your AI technology portfolio.

09
Prompt Training by Function
Get the most out of your investment in AI solutions.

10
AI Governance Regulations
Comply with the EU AI Act and evolving global guidelines.
