

Expedite your eDiscovery process with managed review teams who significantly increase speed, accuracy, and efficiency using Epiq AI Discovery Assistant™.

- Complete reviews 90% faster than TAR or linear review.
- Collaborate with AI consultants, review managers, and teams to simultaneously review data for issues, privilege, and responsiveness.
- Use a chat interface to explore and discover new information and insights that could not have been uncovered using natural language search within documents.

Lower discovery costs and meet deadlines with an experienced team applying first-of-its-kind AI throughout the review process.

Why Epiq Legal Solutions?

Experience the advantage of solutions from a partner specializing in legal and compliance.

Drive decisions with AI-enabled solutions that combine people, process, technology, and data.

Lower Costs With
AI
In The Hands
Of Experts

1 Negotiate AI-based review protocols using best practice examples.

2 Streamline project starts with prompts and models automatically created from review protocols.

3 Use AI to simultaneously score responsiveness, privilege, issues, and confidentiality.

4 Validate AI results using reviewers with AI and subject matter expertise.

5 Protect and log privileged information with a combination of AI and experienced reviewers.

6 Ensure the accuracy of the production set by leveraging systematic and targeted quality control workflows.

Achieve

90%

faster review

Analyze up to

500,000

documents per hour

Selected AI Discovery Assistant™ Features

Use a chat interface to question review data and receive answers linked to cited evidence.

Enhance accuracy with support from pre-trained models for topics such as anger, joy, business plans, and financial documents.

Safeguard matter data with AI that uses private language models that do not train public models.

Review pre-processed and annotated files with automatic entity extraction and linking, infusing Knowledge Layer context for accurate tag prediction.

Gain visibility into AI decision-making and performance with accuracy, precision, and recall metrics.

Epiq Differentiators

- Increase accuracy with a discovery solution that applies the best AI model for each review task in real-time.
- Reduce the risk of missing something important and develop a stronger case strategy with AI that connects verifiable facts from across datasets to surface insights review teams cannot otherwise find.
- Finish reviews faster and for a lower cost with AI that predicts tags for relevance, unlimited issues, and privilege.
- Achieve cost and ROI goals for every matter with the ability to edit, save, version, and reapply protocols freely without triggering additional fees.
- Meet specific geographic and language needs working with a global team.

Deliver better outcomes to clients with new AI technology.
